Courses: **Hyper Island Way Week, 2010**
Hyper Islands take on the UGL-course, read below.

UGL, Understanding Group and Leader, 2008
www.hyperisland.se/index.1088---1.html

“UGL provides training in how a group develops and matures over time, what happens in the group during the course of this development and what behaviour or actions promote or inhibit constructive development. Within UGL, this is referred to as group dynamics. The course also deals with the problems and possibilities of leadership related to the development of the group’s maturity, and what style of leadership will promote both task solving and group development.”
